Experienced Technical Writer with expertise in creating API and developer documentation. Passionate about mentoring, open-source, and explaining complex problems into simple, actionable steps and procedures.

EXPERIENCE

AmbassadorLabs — Technical Writer (*freelance*)

JULY 2024 - Present • Boston, Massachusetts • Remote

As a technical writer at AmbassadorLabs, I craft compelling, technical content tailored to developers and engineers, focusing on cloud-native technologies and API management.

- Authored detailed guides and hands-on tutorials emphasizing Kubernetes, API development workflows, and tools to boost developer productivity.
- Collaborated cross-functionally with product and editorial teams to ensure content aligns with AmbassadorLabs' voice, style, and strategic objectives.
- Conducted in-depth research to break down complex concepts into approachable and actionable technical documentation.

Key Technologies and Languages: **Google Docs, AWS, Blackbird, JSON.**

EverythingDevOps — Technical Content Lead

JUN 2024 - Present • Greater Manchester, United Kingdom • Remote

As the technical content lead at EverythingDevOps, I'm in charge of creating, editing, and reviewing the technical content of the blog.

- Authored up to four technical articles monthly, focusing on DevOps topics to grow the platform's content base.
- Collaborated with other Co-Founders on decision-making processes to shape the direction and vision of the business.
- Contributed to building a repository of valuable technical insights for DevOps practitioners through consistent and high-quality content creation.

Key Technologies and Languages: **Markdown, YAML, Docker, Git & Github.**

[OpenMRS](#) — Lead Technical Documentation Fellow

MAY 2024 - SEPT 2024 • Carmel, Indiana • Remote

As the lead documentation fellow, I spearheaded the revamp of OpenMRS's decade-old wiki to streamline its usability and accessibility for a global community of developers and healthcare practitioners.

- Led the restructuring of over 100 pages of legacy documentation, integrating OpenMRS's brand voice and modern documentation practices.
- Conducted stakeholder interviews to gather feedback and ensured all content met community standards and expectations.
- Enhanced navigation and organization within the wiki, reducing time spent by contributors searching for resources.
- Delivered training materials to empower the community in maintaining high-quality documentation practices.

Key Technologies and Languages: **Confluence, Miro, GitHub, Loom**

[Technical Writers Mentorship Program](#) — Co-Lead (*Volunteer*)

AUG 2023 - Present • Port Harcourt, Nigeria • Remote

As a co-lead of the Technical Writers Mentorship Program, I collaborate closely with the open-source community in creating content and organizing mentorship programs for budding technical writers.

- Designed and facilitated impactful mentorship programs, guiding mentees to develop their skills in technical writing and content creation.
- Regularly engaged with mentors to resolve challenges, refine mentoring techniques, and improve program outcomes.
- Managed logistics for workshops, ensuring high-quality session delivery and seamless coordination with the community.
- Oversaw task assignments and project tracking using Trello to ensure alignment with program goals.

Key Technologies and Languages: **Trello, Markdown, Hugo, JavaScript, Git & Github.**

SELECTED PROJECTS

[TMDB API Reference](#) - Created a comprehensive API reference for The Movie Database using Postman. This project includes clear, step-by-step instructions on authentication, rate limiting, and endpoint usage, which are designed to enhance usability for developers integrating TMDB's API into their applications.

[RAWG API Reference](#) - Documented the API reference for RAWG, the largest video game database, using ReadMe. The documentation covers detailed endpoint descriptions, request/response examples, and best practices for using the API effectively, enabling seamless integration for developers in the gaming industry.

[Node.js Developer Docs](#) – Developed a detailed developer documentation suite for Node.js tutorials from W3Schools using VuePress. Focused on explaining core concepts, syntax, and examples to simplify learning for new and intermediate developers.

[Postman to OpenAPI Converter](#) – Designed and documented a tool for converting Postman collections to OpenAPI Specification files, enabling developers to streamline their API design and documentation workflows.

EDUCATION

RIVERS STATE UNIVERSITY, Port Harcourt, Nigeria — *BSC, Computer Science*

SEPT 2019 - OCT 2022

Programming Coursework: Data structure and algorithm, Compiler construction, Project Management, System analysis and design, Relational databases, Artificial Intelligence.

ALTSCHOOL, Nigeria, Remote — *Diploma, Cloud Engineering*

APR 2022 - JUN 2023

Programming Coursework: Data structure and algorithm, Cloud computing, Linux, Scripting, Technical writing, Open-source, Operating systems, Networking.

SKILLS

Tools & Platforms: Docusaurus, Hugo, ReadMe, MkDocs, Docsify, Mintlify, RapiDoc, Vuepress, Swagger, OpenAPI, Postman, Astro, GitHub, GitLab, AWS, Docker, Kubernetes

Technologies: YAML, JSON, HTML, Linux, Markdown, Asciidoc.

Others: Developer documentation, API documentation, Open-source, Version control, Workflow automation
